SECTION IINTRODUCTION

1. This catalog lists and describes all the parts for the Curtiss-Wright Model P-40E-1 Fighter Airplane. It is divided into 3 sections as shown in the Table of Contents. The pagination of this catalog begins with page one and runs consecutively throughout the entire catalog.

2. The Assembly Parts List (Section II) consists of the complete airplane divided into 7 main groups as shown in the Table of Contents. The major assemblies and subassemblies of the complete airplane are listed in the sequence of construction.

3. The Numerical Parts List (Section III) contains all part numbers in their numerical sequence with the exception of the following groups:

a. All parts that have lost their individual identity as a result of being fabricated into a permanent assembly.

b. All manufacturers standard parts.

c. All Army-Navy standard nuts and bolts.

4. How to Use the Catalog.

a. The Assembly Parts List (Section II) using an indentation system "1-2-3-4-5" which makes it convenient to determine the relationship of the various parts to each other.

b. All assemblies listed under column one (1) indicate the Major Assembly and each further indentation shall indicate relationship to the main assembly.

5. When only the part number is known, refer to the Numerical Parts List (Section III) in order to locate the Assembly Parts List page, on which the part name is shown. In this manner, the complete nomenclature, number and assembly can be supplied when ordering parts.
